

FOR ALL HEAVY DUTY EQUIPMENT AND ATTACHMENTS

DIGIT TRACK

Hour Meters With High Impact Protection Case

DIGIT TRACK is the answer to your questions...

Service

When is service needed? Without operating hours, you will always over or under-service!

Parts

Knowing when parts fail will allow you to optimize your parts inventory, saving time and money.

Warranty

The DIGIT TRACK will assist you in making warranty decisions by providing an accurate record of use.

Sales

Does your sales team know how your customer uses your product? Better information means better understanding.

Engineering

Use warranty and QC repair data to analyze your product and make improvements.

Customers

Having a precise account of operation is a vital tool in keeping customers honest.

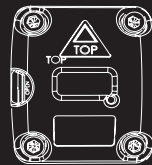

Quality Control

Do you know when parts fail? Record failures in your Quality Control log with serial numbers.

FOR ALL HEAVY DUTY EQUIPMENT AND ATTACHMENTS

DIGIT TRACK

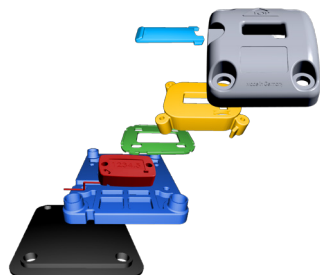

Vibration activated digital hour meters, developed for the harshest environmental conditions, protected by a high impact protection case. The 12-year integrated battery supply makes the DIGIT TRACK a unique stand alone solution for all vibration intense applications.

Ultra strong protection case made of fiberglass reinforced heavy duty rubber.

Automatically records when equipment operates.
No connection necessary.

Designed for Military use,
IP68 digital hour meter with 12 year sealed battery.
